## VALVE BODY W 25 TYPE T

ART. NO. 870001

## GENERAL

The KEOFITT CLASSIC W25 Sampling Valve is the largest KEOFITT sterilizable sampling valve. Designed for very high viscosity sampling. Unique serial no. for each valve ("E" = internal electro polish).

Designed for sampling of liquids with a viscosity of up to approx. 250.000 cP containing no particles larger than Ø17 mm . Sampling of more viscous liquids is possible, only will it take longer (depending on process pressure).

Cleaning/sterilizing: Between batches: Valve in open position: Cleanable by means of CIP using the detergent solution suitable for the actual process media (EHEDG certificate available). Between samples: Valve in its normal closed position: cleanable by CIP as "Between batches" or the valve may be sterilized by means of steam SIP (EHEDG test report available) or chemical SIP using a procedure appropriate to the actual circumstances. For further advice, please
 contact Keofitt.

The sampling valve can be used for any process sampling for microbiological, chemical and/or physical analysis.

## FEATURES

Installation: Tank welding

Operation: Depending on choice of valve head
nlet / Outlet: 1" Clamp
Membrane: Depending on choice of valve head

## CERTIFICATION*

- EHEDG CIP • Conforms to 3-A •3.1 Material Certificate • EU 1935/2004 • Ra Cert. incl. measurements

## TECHNICAL DATA

## Material (product contact)

- Steel parts

## Material (without product contact)
